

Frame dimensions						
Clear opening size		Overall frame dimensions		Finished wall	Internal space	Framework thickness
L	H	Li	Hi	Pf	Si	So
mm	mm	mm	mm	mm	mm	mm
1200*	H	2455	H+67	100 1L	54	75
1400*		2855				
1600*		1695				
1800*		1895				
2000*		2095				

EFFECTIVE OPENING SIZE = NOMINAL OPENING SIZE + 4 mm

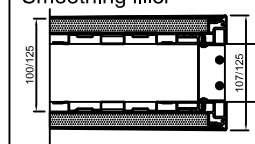

Construct the wall framework with an opening of a suitable size to contain the frame.

Apply an entire plasterboard sheet on the side of the metal box.  
Use one or two reinforced plasterboard sheets to give the metal box greater rigidity and increase its adherence.

Smoothing filler

APPLY FINE MESH FOR JOINTS AND FINISH WITH FILLER. APPLY FILLER TO SMOOTH GAPS BETWEEN THE EDGES OF THE WALL OPENING AND PROFILES.
